DETAILED ACTION

Claim Objections

1. Claims 3-10, 15-17, and 19 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims 3, 4, 6, 7, 8, 15, and 16. See MPEP § 608.01(n). Accordingly, the claims 3-10, 15-17, and 19 not been further treated on the merits.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - ١. Claims 1, 11, 13, 14, 18 and 20, drawn to a method of analyzing the interaction between molecules, classified in class 702, subclass 19.
 - II. Claim 22, 12, 13, 14, 18 and 20, drawn to a method of identifying a molecular species, classified in class 702, subclass 22.
 - Claims 21-23, drawn to a substrate, classified in class 422, subclass 129. III.

The inventions are distinct, each from the other because of the following reasons:

3. Group I and II are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, each group is

Art Unit: 1631

used for materially different function or effect. Group I is drawn to analyzing the interaction, whereas Group II is drawn to identifying molecular species. Furthermore, Group I contains the method step of addition or subtracting molecules from the substrate. Whereas Group II contains the method step of allowing the interaction of molecules to be examined. Since the two groups are have different method steps and are directed to different processes, Group I and II do not overlap in scope and have different functions and effects. Thus Group I and Group II are distinct.

Claims 13, 14, 18 and 20 link(s) Groups I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 13, 14, 18 and 20. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim(s) including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C.

Application/Control Number: 10/797,900

Art Unit: 1631

121 are no longer applicable. In re Ziegler, 443 F.2d 1211, 1215, 170 USPQ 129, 131-

Page 4

32 (CCPA 1971). See also MPEP § 804.01.

4. Groups I and II are related to Group III as processes and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the substrate in Group II may be used for electronic microarrays. Thus the substrate in Group may be used for a materially different process and is distinct from Group I and II.

- 5. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a group to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly

Art Unit: 1631

and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Lin whose telephone number is (571) 272-2561. The examiner can normally be reached on 10:00am-6:30pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang, can be reached on (571) 272-0811. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

900 Page 6

Business Center (EBC) at 866-217-9197 (toll-free). Representatives are available to

answer your questions daily from 6 am to midnight (EST). When calling please have

your application serial or patent number, the type of document you are having an image

problem with, the number of pages and the specific nature of the problem. The Patent

Electronic Business Center will notify applicants of the resolution of the problem within

5-7 business days. Applicants can also check PAIR to confirm that the problem has

been corrected. The USPTO's Patent Electronic Business Center is a complete service

center supporting all patent business on the Internet. The USPTO's PAIR system

provides Internet-based access to patent application status and history information. It

also enables applicants to view the scanned images of their own application file

folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center at (800) 786-

9199.
